

## Borehole Imaging Tools Acoustic Borehole Televierer

BFGeosupply is appointed as an official reseller for all manufacturing program of Electromind. Televierers of this Luxembourg's company represents a major technological advance in the field of borehole imaging tools.

Digital **Acoustic Borehole Televierer** emits continues ultrasonic wave-train by a rotating transducer providing an oriented, an oriented continuous 360° image of the borehole wall. The tool can be used in water, oil and gas wells.

Acoustic Televierer - Technical Data:	
Length:	6.9ft (2.1m)
Diameter Housing:	1-11/16" (42mm)
Max. Operating Temperature:	160°F (70°C)
Max. Operating Pressure:	20MPa (200bar; 2900psi)
Measuring Range:	3" to 15" (75mm to 380mm)

Applications for Acoustic Borehole Televierers are versatile:

- Fracture and Stratigraphy Imaging and Characterization
- Replacement of Coring
- Lithological Characterization
- Replacement of Camera Survey
- Casing Investigations
